

Assignment -4

Docker and Kubernetes

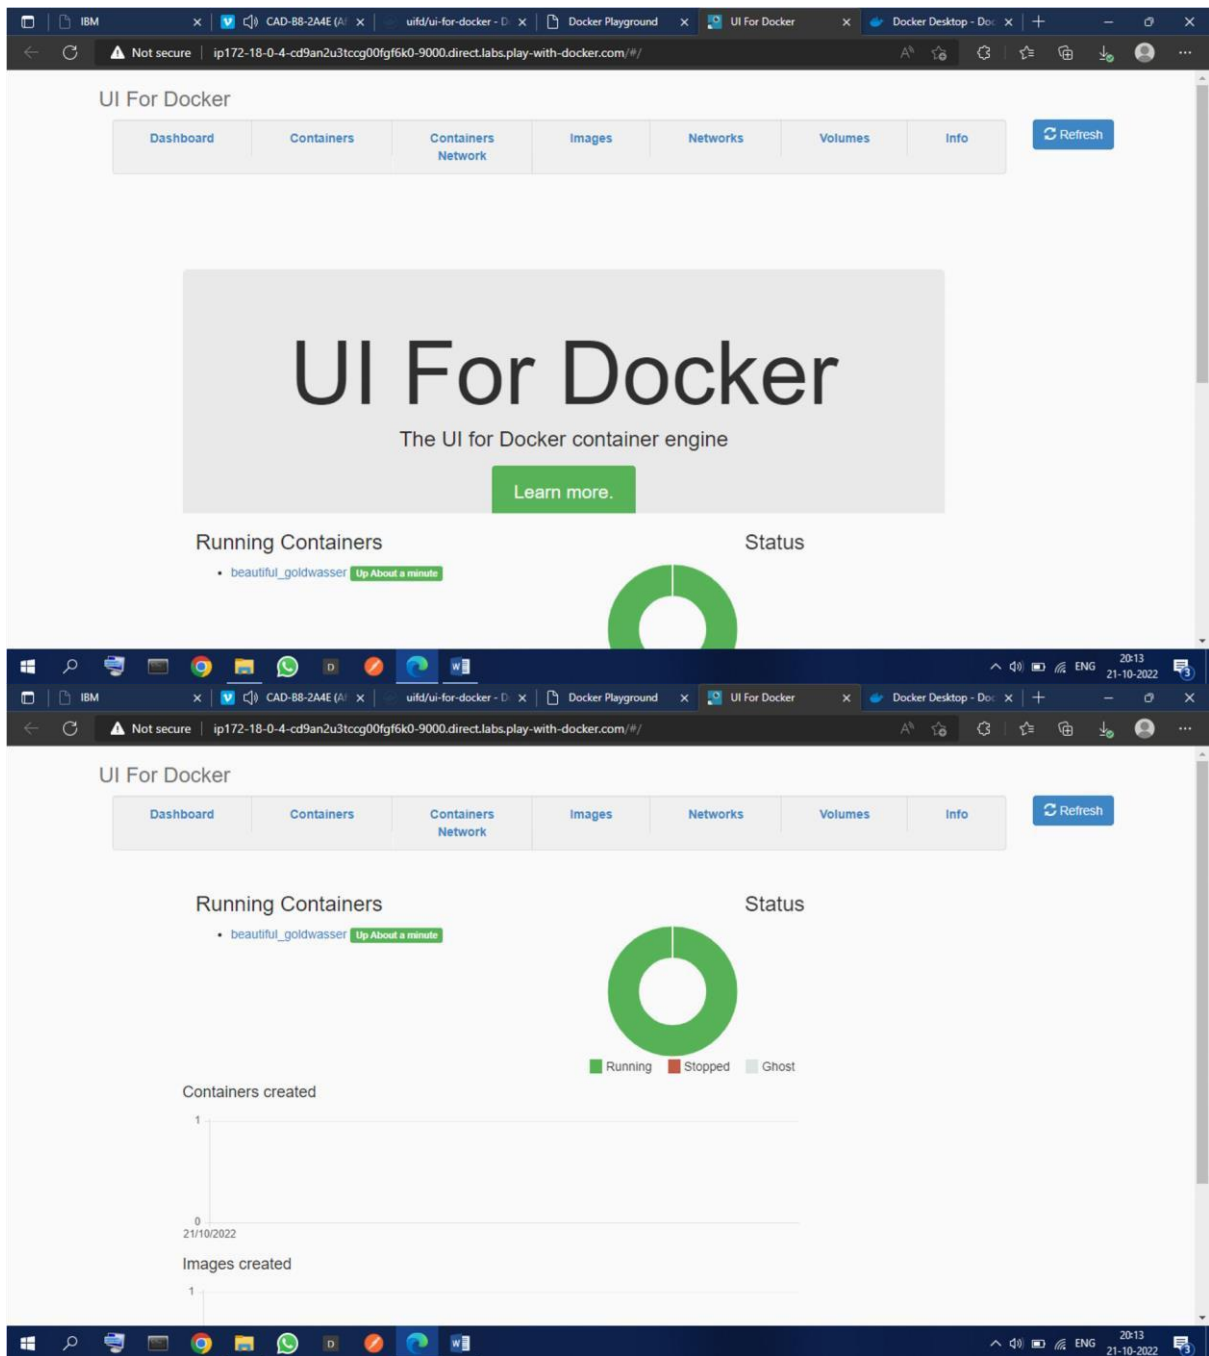

Assignment Date	23 October 2022
Student Name	Liferin Jeni B
Student Roll Number	962219104701
Maximum Marks	2 Marks

1. Pull an image from docker hub and run it in docker Playground

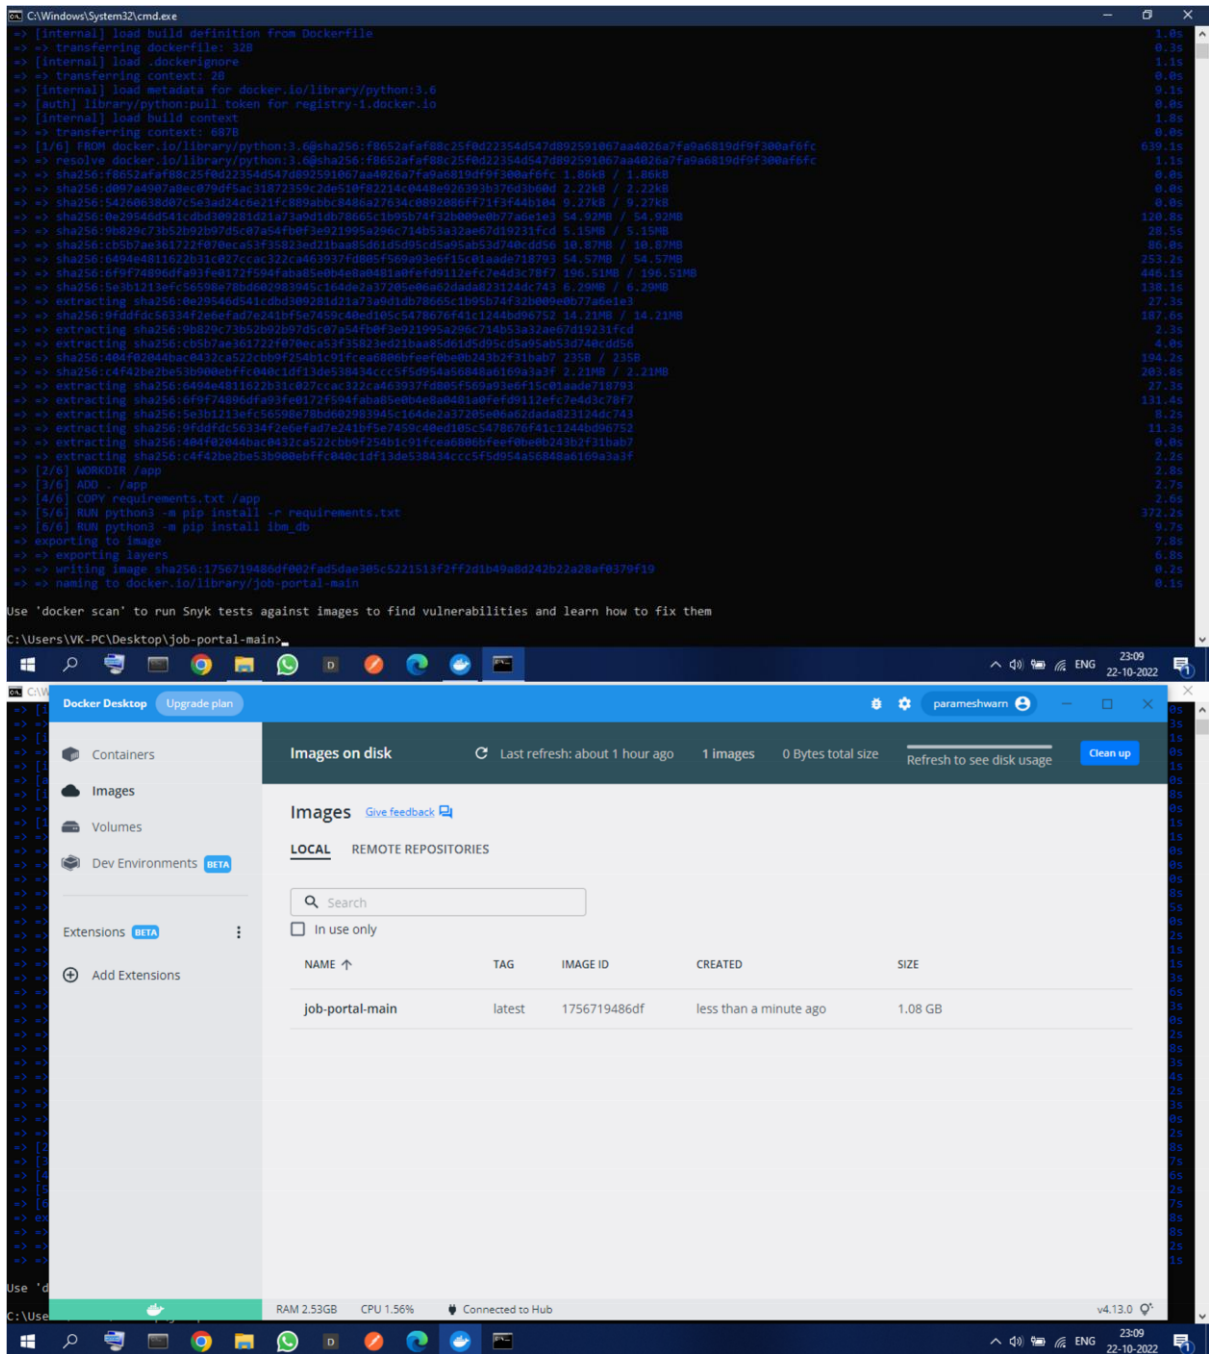

The screenshot displays two browser windows. The top window shows the Docker Hub page for the repository `uifd/ui-for-docker`. The page indicates it is deprecated and suggests using Portainer. A 'Pulls 10M+' badge is visible. The 'Overview' tab is active, showing a description of the web interface for the Docker Remote API. A 'chat on github' button is present. A 'Goals' section mentions that development continues at `portainer/portainer`. A 'UI For Docker' section provides a brief description. A 'Docker Pull Command' box shows the command `docker pull uifd/ui-for-docker`.

The bottom window shows the Docker Playground interface. The session ID is `cd9an2u3_cd9av060qau0008hbjs0`. The IP address is `192.168.0.13`. The 'OPEN PORT' button is visible. The 'Instances' section shows a single instance named `node1` with IP `192.168.0.13`. The 'DELETE' and 'EDITOR' buttons are present. The terminal output shows the following commands and results:

```
# This is a sandbox environment. Using personal credentials
# is HIGHLY discouraged. Any consequences of doing so are
# completely the user's responsibilities.
#
# The FWD team.
#####
(node1) (local) root@192.168.0.13 ~
$ docker pull uifd/ui-for-docker
Using default tag: latest
